## Formalized Mathematics

### Fall 2006

#### **Presentations 1 and 2**

**20 pts.**

Assigned: 10 October 2006

Revised: 10 October 2006

Do these presentations with your group. You and your partner should together prepare both presentations, but you are required to give one of presentations and your partner is required to give the other.

#### **Presentation 1**

After learning how to use your chosen theorem proving system, give a 15-minute (including questions) overview of the system to the class. Describe your experiences in obtaining and installing the system. Your presentation may include a short demonstration of the system.

The presentations will start October 31 and finish November 2. Be prepared to give your presentation 1 on **October 31**.

#### **Presentation 2**

In a 15-minute (including questions) presentation describe your experiences doing the exercises using your chosen theorem proving system. Explain how your system differs from IMPS. Your presentation should include a short demonstration of the system.

The presentations will start November 28 and finish November 30. Be prepared to give your presentation 2 on **November 28**.
