Quiz 5 Answer Key

Instructor: William M. Farmer

9 February 2007

You have 10 minutes to complete this quiz consisting of 2 pages and 5 questions. You may *not* use your notes and textbooks, nor may you use any calculators or other electronic devices. Circle the *best* answer for the multiple choice questions, and write the answer in the space provided for the other questions. Good luck!

- (1) [4 pts.] Donald Knuth is
- (a) A winner of the Turing Award.
 - (b) The inventor of the TeX typesetting system.
 - (c) The author of *The Art of Computer Programming*.
 - (d) All of the above.
- (2) [4 pts.] Javadoc generates Java documentation presented as a set of
- (a) Microsoft Word files.
 - (b) PDF files.
 - (c) HTML files.
 - (d) Text files.
- (3) [4 pts.] Which of the modules from the stack data structure example is a definitional extension?
- (a) `StackAsArray.c`, `Stack.h`.
 - (b) `StackAsLinkedList.c`, `Stack.h`.
 - (c) `StackPlus.c`, `StackPlus.h`.
 - (d) `StackTestProcedures.c`, `StackTestProcedures.h`.

(4) [4 pts.] What is a *data type*?

Answer: A data type is a set of data (usually with a common structure) and a set of operations that can be performed on the data.

(5) [4 pts.] Suppose a class named **Range** has the following two fields:

```
private float start;  
private float end;
```

Write a constructor for this class that (1) takes a value x of type **float** as input and initializes the two fields of **Range** to x and (2) is accessible outside of the class.

Answer:

```
public Range(float x) {  
    start = x;  
    end = x;  
}
```
